

Live Webinar: Dentistry in General Practice

Extraction Techniques – Fundamentals to Finesse

Time: 19:30 UK Time
Date: 06/09/2023

This webinar is suitable for all general practitioners and will review key clinical anatomy, basic extraction technique including effective planning using radiographs, mucosal flap design and elevation, surgical extraction and wound closure. In addition, the webinar will explore how to manage common intra-operative challenges such as root fracture. There will be an emphasis on the knowledge needed to assist the clinician to minimize stress and intra-operative challenges and optimise clinical outcome for the patient.

Meet The Speaker: Andrew Perry is a Diplomate of the European Veterinary Dental College, and it's current secretary. Andrew qualified from Liverpool University and, following 9 years as a general practitioner in South London, began a residency between Vancouver and Swindon. Gaining his diploma in 2018, Andrew became the Head of the Dentistry, Oral and Maxillofacial Surgery department at Eastcott Referrals in 2019. The department now consists of 2 senior clinicians, 3 full time residents, 5 nurses and two dental technicians making it the largest centre outside of universities in the USA.

Andrew's primary clinical interests centre around oncologic surgery and trauma management although he still very much enjoys the immediate gratification of simple periodontal therapy and exodontics. Andrew is passionate about teaching, providing training to undergraduates, general practitioners and specialists in the UK and across Europe.

When not working Andrew will be found with his wife and son walking and cycling in the Cotswolds, making furniture or wrangling bees.

This webinar will be conducted via Zoom and **attendance certificates will be issued** to all those who attend live. The session will be approximately 90 minutes and will include the opportunity for Q&A.
