Vi are proud to present a live interactive webinar with expert speakers, James Elliott & Ciarán Jones. This session will be suitable for those who encounter orthopaedic oncology patients, in both first opinion and referral practice. Those already performing surgical oncology procedures, those who usually refer these patients, and those wishing to learn more about comprehensive management of primary bone tumor are equally welcome to attend. Veterinary Nurses with an interest in oncology are also warmly invited to attend this session.

Guest Speakers

**CIARÁN JONES MVB, MS, DIPL.
ECVS, DIPL. ACVS, MRCVS**

**JAMES ELLIOTT BVM&S CERTSAM DECVIM-
CA-RO (ONCOLOGY & RADIATION
ONCOLOGY) DACVR (RO) MRCVS**

Agenda:

- Approach to a suspected primary bone tumour
 - Pain management
- Radiotherapy options for primary bone tumours
- Chemotherapy options for primary bone tumours
 - Surgical options for osteosarcoma
 - Limb sparing
 - Cementoplasty
 - Amputation
- Percutaneous cementoplasty- technique and follow up

**Ciarán Jones MVB, MS, Dipl. ECVS, Dipl. ACVS, MRCVS
European Diplomate Small Animal Surgery, American
Diplomate Small Animal Surgery**

Ciarán obtained his veterinary degree at University College Dublin in 2014 and completed a small animal rotating internship at Western College of Veterinary Medicine, University of Saskatchewan in 2015. Following his internship year, he moved to Washington State University where he completed a three year ACVS surgical residency and masters programme and was awarded numerous scholarships including for teaching and for his research in exercise science.

Ciarán became a Diplomate of the American College of Veterinary Surgery (DACVS) in Small Animal Surgery and a Diplomate of the European College of Veterinary Surgery (DECVS) in Small Animal Surgery in 2019. Ciaran has worked as a specialist surgeon in North America, the UK and Ireland. Ciarán has a particular interest in arthroscopy, minimally invasive techniques, fracture repair and spinal surgery.

**James Elliott BVM&S CertSAM DECVIM-CA-RO (Oncology
& Radiation Oncology) DACVR (RO) MRCVS
European Specialist in Small Animal Oncology & Radiation
Oncology, American Specialist in Veterinary Radiation
Oncology, RCVS Specialist in Veterinary Oncology**

Following graduation in 2006, James worked in small animal practice, prior to undertaking an internship and residency in oncology at the University of Liverpool. He earned the RCVS Certificate in Small Animal Medicine in 2009, the ECVIM-CA Diploma in Oncology in 2011 and became an RCVS-recognised specialist in Veterinary Oncology. After several years in private oncology practice, James undertook a second residency at North Carolina State University in veterinary radiation oncology. James received advanced training in all aspects of modern radiation therapy, including the planning and delivery of highly sophisticated modes of radiation treatment (intensity-modulated radiation therapy and stereotactic radiation therapy). He has published numerous peer-reviewed articles, is associate editor for a veterinary journal and is the co-author of the neuro-oncology chapter in the 2023 BSAVA manual of Neurology. He has also served as an examiner for several years for both the RCVS and also for the ECVIM oncology diploma. James enjoys all aspects of clinical work, particularly using his skills in both medical and radiation oncology to design custom treatment plans. His goal is to try and improve the quality and length of life of his patients, with as few adverse effects as possible and has a strong interest in the development of stereotactic radiation therapy.

This webinar will be conducted via Zoom. The session will be approximately 90 minutes and will include the opportunity for Q&A. An attendance certificate will be provided for all attendees at the live session.
